

Digital modular operations platform · Digital strategic partner

OptiPeople for OEM manufacturers

✦ Powered by AI + real-time data

Turning machine intelligence into
business advantage — from day one.

Four challenges every OEM manufacturer faces

01 Always competing on price

- Building the best machines is not always enough.
- New generations of customers identify value including smart software solutions alongside hardware.
- Without ongoing customer value, the next sale is won on discount — not differentiation.

02 Warranty costs you can't control

- Machines are installed professionally — but success depends on the operator.
- When something goes wrong, problems are always addressed to the supplier.
- No data means no defence — disputes are resolved by gut feeling, not facts.

03 Customers drift away

- Minimal revenue from spare parts and services after delivery.
- Customer contact is sporadic — only when there is a problem.
- No consistent recurring revenue to rely on in difficult times.

04 Technology is too costly to build alone

- Developing own software solutions is expensive and slow.
- Keeping up with AI, cyber security and latest tools requires continuous investment.
- Dependency on PLC and PC supplier solutions is costly and limits flexibility.
- Difficult to build customised services that create real customer value and revenue.

One platform — machine intelligence at the core — AI-powered

Machine intelligence is the backbone — every service, every revenue stream, every customer relationship is built on top of it.

The OptiPeople platform — what it can do for you — AI-powered

AI & machine data

Integrates AI solutions for predictive maintenance, utilisation optimisation and anomaly detection.

Customer performance reports

Real customer-facing reports on machine performance, energy use, OEE and uptime — branded to you.

OptiAssist — 24/7 support

Digital service desk across borders, in local languages. AI-guided troubleshooting reduces field visits.

Utilisation + problem-solving

Combines machine utilisation data with the customer's ability to resolve issues — closing the loop on service.

OEM app journey — start standard, grow to fully branded

Level 1 — Standard

Start here

OptiPeople standard app

Customers start with the standard OptiPeople platform. Machine data, OEE dashboard, stop registration, AI insights and OptiAssist support — live within days. Zero customisation required.

Level 2 — Customised

Grow with it

Your brand, your features

Add your logo, colours and product-specific workflows. Customer-facing reports with your identity. Feature selection tailored to your machine type and service model.

Level 3 — Strategic

Full OEM ownership

Your own supplier app

A fully customised OEM app, powered by OptiPeople. Your product. Your customer journey. Integrated digital strategy — from pre-sale demo to lifetime service and upgrade path.

Case: IDG — Italian Drying Group

Who is IDG?

Group:	Italian Drying Group (IDG) Brands: Incomac + Nardi
Industry:	Wood drying kilns & systems Founded 1975 — 50 years of expertise
Scale:	10,000+ kilns installed 95 countries worldwide
Mission:	Benchmark in drying — sustainability, energy savings, lasting partnerships

What we built together

- 01 Full digital strategy**
End-to-end OEM digital roadmap — from machine connection to customer lifetime value.
- 02 Incotech branded app**
"Keep your drying rooms under control" — available on Google Play, powered by OptiPeople.
- 03 Freemium model**
10,000+ installed kilns reachable from day one. Free entry, paid upgrade path.
- 04 OptiAssist integration**
24/7 AI support in local languages across all borders

The opportunity

10,000+	kilns addressable from launch
95	countries with installed machines
24/7	OptiAssist support across all time zones
∞	Recurring revenue for every connected kiln

IDG is proof of concept — a full OEM digital ecosystem, built on OptiPeople, already live in the market.

The business case — what it's worth

New

recurring revenue stream
from software subscriptions

Lower

warranty & service costs
through data-backed decisions

Higher

sales close rate
with a differentiated digital offer

Revenue model — illustrative ranges

Revenue stream	Year 1	Year 3
Standard app subscriptions	€12–25k	€45–90k
Customised tier upsell	€8–15k	€30–60k
Strategic OEM app + services	€15–30k	€60–120k
OptiAssist (support SLA)	€5–10k	€20–40k

Illustrative ranges. Actual revenue depends on machine volume, tier uptake and partnership depth.

What the partnership looks like

You bring

- ✓ Your machines and customer base
- ✓ Machine specifications and domain expertise
- ✓ Sales and service organisation
- ✓ CEO commitment and internal ambassador
- ✓ Brand identity for the app

OptiPeople brings

- ✓ OptiCloud IoT platform + AI infrastructure
- ✓ App dev, OptiAssist & branded customisation
- ✓ 55+ OEM production environments of know-how
- ✓ ERP / MES integration capability
- ✓ Ongoing development, roadmap & consultancy

Together: a differentiated digital product your customers return to — and pay for continuously.

Let's explore what this looks like for you.

1

Discovery call

30–45 min. We map your machine portfolio, customer base and current service model.

2

Concept session

We define the right platform tier and OEM app strategy — tailored to your market.

3

Pilot proposal

A concrete scope, timeline and commercial model — yours to review and decide.

How would you like to get started? — your call, your pace

01

Test & discover

Standard platform subscription

From €X/machine/month

- Order a standard OptiPeople subscription directly
- Connect your machines — live within days
- Full access to machine data, OEE dashboards and OptiAssist
- No customisation required — see the value before you invest further
- Cancel or upgrade anytime

Self-service entry point

02

Explore & develop

20-machine pilot — 1 year partnership

Total investment: €12,000

- Subscription for 20 machines over 12 months
- 4 online co-development sessions with OptiPeople
- Define your digital appearance as a supplier
- Explore platform capabilities and customisation options
- Clarify integration paths and go-to-market possibilities

50–100 OptiPeople hours included

03

Strategic partnership

Full OEM digital strategy

Investment on proposal

- Deep involvement: digital strategy for existing + new customers
- Custom OEM app powered by OptiPeople
- OptiAssist integrated into your service model
- OptiPeople consultancy on tactical & operational initiatives
- Ongoing roadmap to improve sales, service and revenue

Scope defined together
